

THE BUZZ

B-TEK Scales' custom bench scales for Owens Corning Co.

May 3, 2010

These portable bench scales required a roller system accessory to meet the client's manufacturing needs. The rugged construction of the bench scale and the framing mean long term productivity, portability and quality. These are just a sample of the custom solutions that B-TEK addresses on a daily basis.

The Customer - Owens Corning shingle manufacturing facility.

The Challenge -Incorporating scale use into a conveyor line to weigh roofing shingles.

The Solution - B-TEK designed a bench scale which allowed the roller assembly to work in conjunction with the scale. The scale was so successful in meeting the need, more were ordered.
