*Multiple truck scale installation for the  
Marcellus Shale location  
July 12, 2011*

The Brechbuhler Scales' Youngstown, Ohio branch is providing six 96' Centurion Digital scales to the facility in support of the work at the Marcellus Shale in central PA. Via rail, a specialized sand used for fracking in the gas drilling industry will use these scales to weigh the materials that the rail off loads into the silos and loaded into truck for delivery to various drilling sites.

**The Clients - Brechbuhler Scales**

**The Challenge** -Turn-key truck scale solution for the energy industry with multiple locations using digital technology and rail transportation.

**The Solution** -A multi scale installation used to weigh specialized sand for the drilling of the Marcellus Shale in central PA.
