

# THE BUZZ

*B-TEK Scales creates a custom battery powered, portable floor scale.*

July 16, 2010

*B-TEK Clydesdale Floor Scales can be fabricated in many sizes and capacities for different scale needs. Above ground or pit type Clydesdales are available with optional ramps, bump ramps, detachable or integral columns and many indicator options. B-TEK Scales dealer, Dave Arnold with Advanced Weighing Systems, Inc. of Addison, IL was the key component facilitating this project.*

## The Customer - Steel Processing Plant

**The Challenge** -Creating a Clydesdale Floor Scale that is portable and battery operated.

**The Solution** - A custom Clydesdale Floor Scale with a battery powered indicator on a portability frame with specific height requirements was fabricated. This allowed accommodation for the customers forklift to move the portable scale and transmit the weight wirelessly to the computer. The end result saved time and money by eliminating a handling step of weighing the product remotely as well as reducing product damage.
