

# THE BUZZ

*B-TEK Scales fabricates two 4 Square scales used simultaneously together*

*July 30, 2010*

*B-TEK 4 Square Floor Scales can be fabricated as an above ground or pit type scale. 4 Squares are available with optional ramps and many indicator options. B-TEK Scales dealer, Woody Woodard with American Scale Corporation of Louisville, KY was the key component facilitating this project.*

**The Customer - Horse Weighing at the Kentucky State Fair**

**The Challenge -Weighing horses with an adjustable platform length.**

**The Solution** B-TEK Scales manufactured two 4 Square floor scales for weighing horses at the same time. The customer spaced the scales at their desired length apart and weighed the horses by placing a board across the two platforms. This allowed the desire length of the scale to be adjustable while serving it's weighing needs.
