

PARTICIPATING IN THE AGG1 SHOW  
FEBRUARY 2010

VISIT B-TEK SCALES LLC AT THE AGG1 / WORLD OF ASPHALT SHOW  
FEBRUARY 15-18 AND LEARN ABOUT

MSHA COMPLIANT **SIGHT RAILS** , THE NEW D1050 TOUCH SCREEN  
INDICATOR AND MORE!

Current regulations being enforced by MSHA have many mining companies scrambling to comply with requirements of sight rails to be at least mid-axle height of the largest vehicle to cross the scale, to avoid penalties and fines. B-TEK Scales has always offered the option of sight rails for customers and can provide a compliant\* set of MSHA sight rails for your existing truck scales and approaches. Also at the show, we will have our latest D1050 touch screen indicator on display. This new digital tool can be fully customized to meet your facility needs, expediting your data and monitoring your scale needs.

Visit our booth in the testing pavilion, Booth 1711

\* Check with local MSHA inspector / office for equipment approval.
