STAINLESS STEEL SCALES—

ANSWERS THE NEED FOR LONG LASTING QUALITY

Stainless steel properties are numerous, making it the perfect metal for many industries. The corrosion resistance combined with higher ratings for heat and fire resistance makes stainless steel scales last longer and be a more cost-effective purchase for so many industries. Recycling plants with acidic based materials, steel mills handling high temperatures, even environmental clean up facilities....and so many more companies, can benefit from a stainless steel fabricated scale. B-TEK can manufacture any of their custom scales, in stainless steel. From their extensive line of truck scales, including the Centurion to bench scales and floor scales, stainless steel is a popular option.

For more information regarding a custom stainless steel scale, contact your B-TEK Scales, LLC representative today.
