

Brechtbuhler Scales provides General Motors QC scales for Lordstown, Ohio built Cruze

A White paper illustrating Brechtbuhler Scales' ability to create custom scale solutions for various industries

July 2010

Contributors: Pete Kostalas, Tracy McCracken

Brechtbuhler Scales' branch in Youngstown, Ohio worked directly with the GM plant in Lordstown, Ohio, to design a scale for the audit/quality control department. The Lordstown Plant is manufacturing the new Cruze sedan in the GM fleet. B-TEK Scales fabricated the scales.

"Precision is also seen in the Cruze's build quality. The Lordstown assembly plant's body shop was retooled with the latest in body-framing and welding equipment to optimize the manufacture of a very solid body structure. That strong structure fosters minimal production

"We can surpass any plant in the world, including the foreign market, that plant, our product, are the future of General Motors."

-Jim Graham,
president of UAW
