

Celebrating 150 Truck Scales Together

15+ Years of Partnership
Between Republic Services
and B-TEK Scales

This year, Republic Services and B-TEK Scales are celebrating a major milestone — the installation of our 150th truck scale. For more than 15 years, B-TEK has been Republic Services' preferred partner for truck scales at landfills, transfer stations and recycling centers across the country.

WHY B-TEK?

Strongest Weighbridge in the Industry

Built with more steel than any other manufacturer, B-TEK truck scales are proven to deliver life expectancies of 15+ years in tough environments.

Digital Load Cell Technology

Guaranteed against lightning and surge with a stainless-steel body that protects against water and submersion. This load cell performs in the toughest environments: trash, dirt, debris, snow and ice to name a few.

Maximum Uptime

On-board diagnostics simplify troubleshooting, while load cell and cable replacement can be completed in less than 30 minutes.

Nationwide Service Network

With 150 service locations across the United States, Republic Services' facilities are supported whether maintenance is handled in-house or by B-TEK's trained technicians. Communication is handled by dedicated Regional Managers to support our needs.

Together, B-TEK and Republic Services continue to raise the standard for scale performance, safety and service — delivering dependable weighing solutions that keep critical operations moving forward. Here's to the next 150!
