

Replacement wheelchair patient scale

April 2011 Contributors: Tracy Walker

Service calls can develop into a replacement scale installation. Problematic scales in the medical industry often frustrate the faculty dealing with them on a daily basis. Brechbuhler Scales' Cincinnati branch eventually replaced such a scale for a kidney dialysis center

The Clients Kidney Dialysis Center

The Challenge Replace a problematic flush floor mount scale without changing the dimensions of the existing foundation.

The Solution The B-TEK floor scale was custom fabricated for the center to fit the existing flush mount foundation. The printer and indicator were mounted on the wall and a handrail for patient support, was also mounted on the scale.
