Over 95 years of combined manufacturing experience

HOPPER SCALE

From fertilizers to grains, the B-TEK Hopper Scale is the perfect fit and solution for agriculture customers. We can customize your Hopper Scale to fit any requirement as well as install wheels on it for those customers who need a portable solution.

B-TEK's Hopper Scale will improve mixing accuracy and save time/labor. This unit features a 12-cubic foot capacity hopper set on dual precision single point load cells. The Hopper Scale has a capacity of 1,000 lb. The loaded product weight is displayed on a weight indicator with rechargeable battery, stainless steel housing, and LCD backlit display.

Made of heavy-duty structural steel, the Hopper rides on smooth rolling, fixed front and rear swivel casters. The Hopper has a quick-acting gravity bottom discharge slide gate, which is manually controlled by a lever located near the push handle.
